

UltimaCase Designs Custom FZ-G1 Panasonic Tablet OP Case for Furniture Retailer.

UltimaCase by AGORA Edge was introduced to a home furnishing company in need of a solution for carrying their Panasonic FZ-G1 tablets.

This retailer needed a more compact case and strap that would easily fit into a charging dock along with the device. Their current stock solution took up more space than they liked, leading them to only be able to fit 10 charging docks for the tablet in each of their charging cabinets.

AG3230DW FEATURES

Slimmer in order to take up less space in a storage cabinet

Stylish, easy-to-clean, leather-like material

Access to all buttons and ports

OUR CUSTOM SOLUTION

UltimaCase designed their OP Case for the FZ-G1 tablet (P/N: AG3230DW) with a hand strap and shoulder strap to be compact and maneuverable.

That way, it easily fits in a docking station without compromising the quality and durability of the solution. See the AG3230DW here www.ultimacase.com/fz-g1-case

DESIGN & RESULTS

The 2-in-1 shoulder and hand strap solution allows for more carrying & deployment options.

The hand strap is secured tightly against the case for both comfort and stability in use.

D-rings were added to all four corners for maximum flexibility.

A cutout was added for the cooling vents to provide airflow and prevent the device from overheating.

The slim design allows up to 15 devices to store in one cabinet. The previous solution stored only 10 devices.

Need cases, hand straps, or holsters for Panasonic products?
